## SPILL TRAYS

Our ST range of spill trays provide a cost effective solution to the storing of smaller containers in liquid dispensing work areas, dosing points, laboratories etc. There are 6 standard sizes available all with easy to remove grids for quick access to clean up drips and spills. Model ST66WH is a mobile version fitted with swivel castors and a full width handle to make moving small containers easy.

**GPT1**

**COMPLIANCE**

A "secondary containment system" is defined as a drip tray, an area surrounded by a bund or any other system for preventing oil which is no longer in its container from escaping from the place where it is stored.
